# External QA

- External quality assurance of education and training by QQI
  - At **institutional** level, for all VET and HE providers, public and private, covering education, training, research and related activities
  - At **programme** level, as an awarding body, for all FET providers and private HE providers
    - Public HEIs (universities) have full autonomy to design and award credentials

# NFQ

- NFQ launched in 2003, based on learning outcomes
- *"The single, nationally and internationally accepted entity, through which all learning achievements may be measured and related to each other in a coherent way and which defines the relationship between all education and training awards."*

# NFQ and micro-credentials

- Includes different classes of awards
  - Major (example, bachelors degree, at least one year study)
  - Minor (module(s) from major that form coherent package)
  - Special purpose (specially designed programmes)
  - Supplemental (obtained after major) – (rarely used)

# Private HEIs – QQI Awards

- Small share (<10%) of HE provision generally, may have been earlier movers in micro-credentials than universities because of funding

# Rising demand

- Streamlined process for ex-ante validation/accreditation of programmes in private HEIs for micro-credentials
- “Piggy-backs” on regular process for degrees
- Case study - validation of microcredentials

# IUA MicroCreds project

- New government-funded project with funding of €12.3 million (2020-2025)
- 1) Develop collective national framework for micro-credentials across IUA universities, 1<sup>st</sup> in Europe
  - 2) Build & develop dynamic and sustainable model of enterprise engagement for micro-credentials
  - 3) Design & develop a coordinated 'Discovery Platform' online portal to drive awareness of, and access to, micro-credentials (linked to a digital credentialing solution)
  - 4) Develop suite of micro-credential courses

# Different approaches

- Full *ex ante* external programme QA (private HE)
- Supplementary external programme QA (private HE)
- Internal QA within national framework (public universities)

# Conclusions

- 
- Quality assurance operates differently for microcredentials
  - Shorter feedback loops than for major awards
    - In development
      - But note stakeholder input time/effort
    - In delivery
      - Lower opportunity cost
    - In impact
      - Learner satisfaction, graduate satisfaction, labour market outcomes, stackability
  - Market model is more applicable, but incentives must be aligned to ensure responsiveness
